

Fantastic! Unbelievable!

Insurance

World Sensation Stunt Show ensures that all necessary insurances are taken out for each arrangement to cover any damage to the site or third-party.

Tickets/entrance

The stunt show lasts about 1½ hours, with a break of about 15 minutes during the show. It must be possible to demand an entrance fee for the stunt shows. We will ensure the fencing-off of the site with our own equipment, unless the site is already fenced off.

Parking of trucks/caravans

The equipage comprises 15 trucks/cars and caravans, which means that we wish to be able to park/stay for the night (see attachment). When moving on, the site will be left in a tidy and cleaned-up state.

Press material

We will arrange press releases, marketing and advertisements, etc. for each individual arrangement.

Fantastic Stunts!

Motorcycle show

Here we show you leaps over up to 15 cars, driving on the back wheels over long distances, leaps over a line of people, and jumps through burning obstacles. Here it is also possible for members of the audience to take part by sitting pillion on a three-wheeled motorcycle (trike).

Unbelievable!

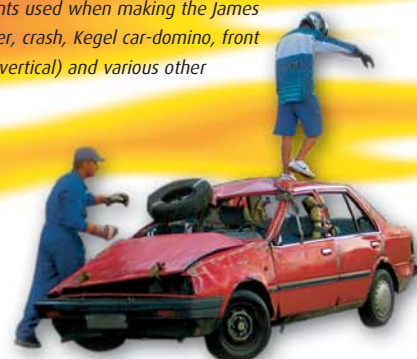

Bigfoot

Our show has been extremely popular everywhere we've been. We drive bigfoots over a number of car wrecks, just as you've seen them do it on the satellite TV channels, such as Eurosport.

Cars

Auto stunt show with production cars on two wheels driving through burning walls of fire with a stunt man standing on the bonnet, display of stunts used when making the James Bond films, Capolo roll-over, crash, Kegel car-domino, front collision with car on end (vertical) and various other auto stunts.

History!

The Lemoine family's traditions can be traced back to the mid 1800s. We are going to travel back to the 1850s when young Willi Lemoine, having finished his schooling at Fru Lonardi's and her Sirkus Impress in Norway, began his job as a line dancer under the name "Willano" in the legendary Cirkus Krone in Munich. This appointment turned out to be the start of the Lemoine enterprise as we know it today. "Hochzeoltruppen Lemoine" was a travelling company which performed amazing stunts on steel wires stretched between high buildings such as church towers, often in the middle of town centres. In recent years, stunt shows with cars and motorbikes have taken over as the big attraction in the USA, where they have also been inspired to build over-dimensioned cars with enormous wheels called Bigfoot. It is this type of stunt show for which the Lemoine family is famous today and which has led them to travel all around the world to give their shows.

We want to visit you during our tour!

In connection with this year's tour, we would like to visit a number of towns and villages (see separate attachment) in order to perform this type of stunt show, we prefer to have an asphalted area, a car park, a dockyard or a gravel sports ground of about 120x40 metres. It should also be possible for us to use an electrical outlet (3x35 amp.380volt) and have a water supply close to the site.

We will take care of all applications, permits and requirements, from bodies such as landowners, public authorities and police, in connection with the arrangement.
